DETAILED ACTION

1. The amendment filed 12/28/2007 has been entered. Claims 1-30 are pending in this Office action.

Claim Rejections - 35 USC § 112

2. Claims 20-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20-25 recite a constant envelop continuous phase modulation waveform communication system. Such claim, consequently, is considered as a single means since the claim invention does not seem to appear in combination with another recited element of means. Consequently, such claim is held non-enabling. See MPEP 216.08(a).

Allowable Subject Matter

3. Claims 1-19, 16-30 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art discloses a method for improving the bandwidth efficiency of a continuous phase modulation signal comprises of plural symbols over a communication channel comprising: modulating a carrier frequency with the coded input data stream as a constant envelope continuous phase modulation waveform; and converting the constant envelope continuous phase modulation waveform into a non-constant envelope continuous phase modulation waveform thereby improving the bandwidth of

the signal, wherein the step of converting includes interpolation of a path between constellation points along a chord connecting successive constellation points.
